

About Us

The Feingold[®] Association of the United States, Inc., founded in 1976, is a non-profit organization whose purposes are to generate public awareness of the potential role of foods and synthetic additives in behavior, learning, and health problems, and to support its members in the implementation of the Feingold Program.

Neither a diagnosis nor a prescription is required to use the Feingold Program as a healthy diet choice for children and adults.

The Feingold Association does not endorse, approve or assume responsibility for any product, brand, method or treatment. The presence (or absence) of a product on a *Feingold Foodlist*, or the discussion of a method or treatment does not constitute approval (or disapproval). The *Foodlists* are based primarily upon information supplied by manufacturers and are not based upon independent testing.

This booklet is for educational purposes only. This information is not intended to replace competent medical diagnosis and care.
