Salicylate elimination diets in children: is food restriction supported by the evidence?

Richard F Heller, C Ann Heller and Jane Heller

To the Editor: The two contributions by Gray and colleagues1 and loblay and colleagues2 on the topic of salicylate intolerance illustrate that absence of evidence does not equate to evidence of absence.3 Neither paper quotes the admittedly sparse European peer-reviewed literature on the topic, including

Richard F Heller, Emeritus Professor4
C Ann Heller, Retired Radiologist2
Jane Heller, Senior Lecturer3
